

Store Sales Forecasting

Corporacion Favorita demand forecast portfolio project

The recommended model is lightgbm_v1 for a 16-day forecast at date, store and family grain. On the validation window 2017-07-31 to 2017-08-15, LightGBM reached RMSLE 0.4167, WAPE 14.6%, and total bias -0.08%.

Metric	LightGBM	Reference
Granular RMSLE	0.4167	0.5216 baseline
Granular WAPE	14.6%	20.8% baseline
Daily RMSLE	0.0574	0.1070 Prophet
Future forecast rows	28,512	
Future predicted sales	12,338,063	

Operational handoff

Use dashboard/data_exports as the Power BI import layer. The API expects model-ready feature records and returns non-negative batch sales forecasts with validation diagnostics.
